Meeting Minutes – 04.02

Attendees:

- Ine (TA)
- Alvaro
- Julius
- Carlos
- Matt

---

1. Updates on Progress

- Presented our progress so far:
    - Designed the **front page**.
    - Planned the **database schema**.
    - Set up **tasks and work for the sprint** in Jira.
- Discussed whether the planned **features/tasks** were too extensive to include in the first sprint.

---

2. Discussion Points

- **User Stories:**
    - Asked how user stories should be presented.
    - The TA explained that the **feature list**, **user stories**, and **personas** should be included in the appendix. These will be referenced in the main report whenever relevant.
- **Database Model:**
    - Confirmed that the **table model** could be included directly in the report.
    - It was noted that additional tables might need to be created as the project progresses.
- **Report Guidance:**
    - The TA showed an **example report** and **sprint plan** for reference.
    - Highlighted that the size of the appendix doesn't matter—it serves to document the effort and work done.

---

3. Action Items

- Refine the list of tasks for Sprint 1 based on feedback.

- Organize user stories, personas, and feature lists for inclusion in the appendix.

- Prepare the database schema and ensure its structure is ready for implementation.

- Review the example report and sprint plan for guidance on structure and content.
